

Seminar on Advanced Technology for Lifelong Open and Flexible Learning

Educational Research and Technology (ER&T)

Date: May 27, 2005
Venue: FernUniversität in Hagen

FernUniversität in Hagen

Since its foundation around 25 years ago the FernUniversität in Hagen has developed into one of the biggest universities in Germany. As the first and only distance teaching university in the German-speaking countries and regions it offers degree programmes at the under-graduate and graduate levels as well as research-oriented academic further education. The FernUniversität now includes six faculties: Computer Science, Economics, Cultural and Social Sciences, Electrical and Information Engineering, Mathematics and Law.

The systematic use of traditional and new media enables teaching at a high quality level. Continuously challenged the FernUniversität in Hagen, already today, is the university of the future for a world of tomorrow.

Academic Network Meeting

The ER&T academic network is headed by Chris Curran (Dublin City University). It incorporates a collective expertise and experience in the field of computing and communication technologies for Lifelong Open and Flexible (LOF) learning. To exchange its knowledge the ER&T network is actively engaged in an on-going programme of meetings at leading-edge research institutions. Members of the ER&T academic network frequently meet for new developments. Recurring items on the agenda: technological and educational developments, EC projects and programmes, consultation meetings and reporting, external funding opportunities, scientific publications, cooperation with e-learning industry, site visits, seminars, annual conferences and the like. On May 27, before the seminar, the academic network meets from 9.00-10.30.

Seminar

The May 27 seminar is dedicated to advanced technology for lifelong open and flexible learning and kicks-off on Friday at 10.30. Prospective contributions are:

- Maciej Kuszpa: Mobile Learning in Economics Education
- Birgit Feldmann: Virtual Index Cards in CS
- Luise Unger: Flashcards in Mathematics Higher Education
- Ulrike Schultz & Sandra Hansen: Equal Opportunities in comparative perspective
- Gerd Steinkamp: FuXML: A Content Authoring System
- Timo Borst: Building Content with Reusable Learning Objects
- Birgit Bomsdorf: Applications of Mobile Learning in Distance Education

The seminar, kindly hosted by the Fern-Universität in Hagen, is a research-based seminar. Seminars and/or site-visits at leading-edge research institutions are both productive and popular. They involve several renowned researchers from member-institutions and/or invited persons from external bodies, allowing for the expansion, harnessing and disseminating of information on leading-edge research-based issues in LOF learning.

Registration

Members' registration is mandatory. Ask for the registration form at: secretariat@eadtu.nl.
